## WORK EXPERIENCE

### Graduate Assistant – Student Success (Data Analysis & Retention Analytics)

05/2025 – Present

*University of Texas at San Antonio (UTSA)*

- Analyzed student engagement and performance data using institutional systems (e.g., Civitas/ Inspire) to identify at-risk students and support retention initiatives.
- Conducted outreach to 100+ students per semester and analyzed response trends to evaluate intervention effectiveness and engagement outcomes.
- Maintained accurate records and generated summary insights to support data-informed decision-making within the Student Success team.

### Web Development Intern – OASIS INFOBYTE

05/2023 – 07/2023

*India*

- Developed responsive web applications with structured data handling and client-side input validation to ensure accurate user data processing.
- Implemented logical data workflows and form validation mechanisms to improve data integrity and application reliability.
- Conducted testing and Performance Analysis to optimize application responsiveness and user interaction efficiency.

## EDUCATION

### Master of Science in Artificial Intelligence with Analytics Track

*The University of Texas at San Antonio (UTSA)*

### Bachelor of Technology in Computer Science

08/2024 – Present

*SRM University*

06/2020 – 05/2024

## TECHNICAL SKILLS

**Programming & Analysis:** Python, SQL, R, JavaScript

**Visualization & BI:** Power BI, Tableau, Looker Studio, DOMO

**Cloud & ETL:** BigQuery, Snowflake, Airflow, DBT, Fivetran

**Analytics & Concepts:** A/B Testing, Hypothesis Testing, Customer Segmentation, Predictive Modeling, Data Wrangling

**Other Tools:** Excel/Google Sheets, Git, Google Workspace, Apps Script

## PROJECTS

### Impact of Revenues on Education Enrollment

*R, SAS, Line Plot, Pie Chart, Bar Chart*

- Analyzed U.S. state-level education revenue and expenditure data to assess impact on Pre-K–12 enrollment trends.
- Built linear regression models ( $R^2 = 0.898$ ) to evaluate funding patterns and enrollment relationships.
- Identified significant correlations to support data-driven education policy insights.

### Customer Spending Analysis

*Python (Pandas, NumPy), K-Means Clustering, Matplotlib, Data Visualization*

- Analyzed 1,000 customer records to evaluate the impact of demographic and behavioral factors on spending patterns.
- Applied K-Means clustering ( $k=3$ ) to segment customers and identify high-value groups.
- Generated actionable insights to support targeted marketing and revenue optimization strategies.

### Medical Image Classification Analysis

*Python, Data Preprocessing, Model Evaluation*

- Processed and analyzed labeled medical image datasets to evaluate classification performance.
- Performed feature extraction and model comparison to improve prediction accuracy.
- Assessed model metrics to determine optimal configuration for image-based detection.
